Subject: Re: EPA Site Progress Profile Upgrade: WASTE OF TAXPAYER RESOURCES

Dear Director Woolford,

Thank you for this considered reply.

I still do question the value to the public of this migration project as compared to its cost, which, although admittedly unknown to me, I estimate to be many millions of dollars in taxpayer resources. I could begin the research to find out exactly how much SEMS has cost, but I think I will leave it at my unproven estimate for now.

My more important point is the years-long lack of accessibility of the public information, which has in my opinion actually been made worse by the apparent outcome of this much-delayed project, as I previously detailed and documented.

In your response you state: "The Koppers Oroville SPP currently does not have administrative records or other site documents available. The link to the administrative records and other document collections is a new functionality that did not exist prior to the October 1 redesign."

This statement is both self-contradictory and wholly incorrect.

Please see the slideshow I prepared and sent to Stephen Tzhone on August 23, 2013; sent again to John Meyer on April 14, 2014; sent a third time on July 24, 2015 to Jennifer Hovis; sent a fourth time when I attached it as PDF to this email thread, initially directed to Stephen Tzhone on October 07, 2015; and which I attach again here.

Has anyone at EPA looked at my slideshow yet?

The extensive administrative record and supplemental documentation and resources that Region 9 provided in the Koppers Oroville example (which was replaced with the new, vacuous format) was selected by me as exemplary over two years ago.

The exact same collection of web pages—the "Site Overview" for Koppers Orobill—is currently accessed

9643546

by a static link

(<http://yosemite.epa.gov/r9/sfund/r9sfdocw.nsf/bysite/koppers%20co.%2c%20inc.%20%28oroville%20plant%29?opendocument>) as described below.

The flawed SEMS project has only served to bury the above "Site Overview" further from public accessibility by removing it as a search result in "Search Sites Where You Live."

I am repeating myself, but you appear to have been misinformed about the previous and current existence and authorship of the administrative record and other site documents for Koppers Oroville found at the above link.

They are not a "a new functionality that did not exist prior to the October 1 redesign" (an appalling claim that smacks of plagiarism) but have existed, in their present, lowtech-but-highly-informative state, since at least August 23, 2013.

Sincerely,

Charles Grisham, Junior
